

Spectra S1 Plus Breastpump

The S1 boasts so many great features and is designed to truly meet the needs of moms wanting to feel confident that they have an effective, powerful breast pump to support supply while also incorporating features to make life a little easier.

Like all Spectra pumps, the S1 is a closed system – a physical barrier between the milk and the pump ensures hygiene and motor performance.

With a maximum suction strength of 270 mmHg and the ability to be used as a single or double pump, plus a host of additional features, the S1 is set to become the ultimate breast pump to support breastfeeding moms.

Completely flexible, touch button, with the S1 pump's digital controls. These allow you to set the pumping program to the speed and rhythm most effective for your body.

The suction is adjustable in both let-down and expression mode! Includes timer and night light. This pump is also really quiet!

Features:

- Single or Double Electric Breast pump
- Vacuum Range 0-270 mmHg
- Back Flow Protection/Closed system
- 2 phase pumping
- Cycle length 38-54 expression/70 massage mode
- Portable: lightweight of only 4lbs
- Powered with an AC adapter
- Nightlight
- Timer
- Quiet
